

**CITY OF SEATTLE**

**RESOLUTION \_\_\_\_\_**

..title

A RESOLUTION prioritizing people over the profits of pharmaceutical companies; supporting the production of COVID-19 vaccine around the world; urging President Biden to end U.S. opposition to the Waiver from Certain Provisions of the Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement for the Prevention, Containment and Treatment of COVID-19 at the World Trade Organization (WTO).

..body

WHEREAS, COVID-19 is a global pandemic, spreading internationally; and

WHEREAS, rapid and widespread dissemination of vaccinations in all countries is at the center of the strategy by public health professionals to stop the spread of COVID-19 through the development of herd immunity; and

WHEREAS, new COVID-19 variants continue to develop throughout the world, and the sooner vaccines are available in all countries, the greater the likelihood of success in the battle against COVID-19; and

WHEREAS, vaccinations are critical to reopening and economic recovery in both developed countries and the Global South; and

WHEREAS, one in five of Seattle’s population is born in another county and they, and many more Seattle residents have family abroad, some living in countries without adequate access to vaccine; and

WHEREAS, on April 9, 2021, CNBC quoted World Health Organization (WHO) Director-General Tedros Adhanom Ghebreyesus regarding vaccine doses that “over 87% have gone to high-income or upper- and middle-income countries, while low-income countries have received just 0.2%,” and that “[o]n average, 1 in 4 people in high-income countries

1           have received a coronavirus vaccine, compared with just 1 in more than 500 in low-  
2           income countries, according to Tedros”; and

3   WHEREAS, on February 17, 2021, *The Wall Street Journal* reported, “The disparity could also  
4           slow the global economic recovery more broadly and prolong the pandemic, by creating  
5           pockets of unchecked infection that could become breeding grounds for mutations of the  
6           virus,” and that “[a] recent study by the U.S.-based National Bureau for Economic  
7           Research concluded that a failure to inoculate all countries equitably could wind up  
8           costing advanced economies up to \$2.6 trillion—far more than the cost of supplying  
9           global vaccine coverage”; and

10   WHEREAS, the World Trade Organization (WTO) Agreement on Trade-Related Aspects of  
11           Intellectual Property Rights (“TRIPS Agreement”) enforces intellectual property (IP)  
12           rights internationally, including prohibiting the production of COVID-19 vaccine doses  
13           in many low-income countries; and

14   WHEREAS, the WTO has been widely criticized for prioritizing the profits of multinational  
15           corporations over the needs of regular, working-class people around the world, prompting  
16           the historic protest in Seattle in 1999 at the WTO Ministerial Conference; and

17   WHEREAS, global trade laws under capitalism maximize profits for the elite in all countries, at  
18           the expense of all working people around the world and especially in the Global South;  
19           and

20   WHEREAS, on March 15, 2021, *Pharmaceutical Technology* reported that WTO representatives  
21           from South Africa and India “asked the WTO to allow member countries to waive  
22           intellectual property (IP) rights, including patents, related to Covid-19 vaccines and other  
23           technologies for the duration of the pandemic”; and

1 WHEREAS, the March 15 *Pharmaceutical Technology* article further reported that “the US, the  
2 UK and the European Union (EU), among other richer countries, have been vocal  
3 opponents of the IP waiver proposal” in addition to the U.S. Chamber of Commerce and  
4 the International Federation of Pharmaceutical Manufacturers and Associations (IFPMA);  
5 and

6 WHEREAS, on March 10, 2021, Reuters reported, “Richer members of the World Trade  
7 Organization (WTO) blocked a push by over 80 developing countries on Wednesday to  
8 waive patent rights in an effort to boost production of COVID-19 vaccines for poor  
9 nations”; and

10 WHEREAS, on February 26, 2021, a letter to President Biden signed by over 400 community  
11 organizations and labor unions (Attachment A to this resolution) stated that “we urge  
12 your administration to lift the U.S. blockage of the ‘Waiver from Certain Provisions of  
13 the TRIPS Agreement for the Prevention, Containment and Treatment of COVID-19’”;  
14 and

15 WHEREAS, the letter further entreats President Biden, “with so many of the world’s nations  
16 supporting this emergency waiver already, you can also help restore America’s moral and  
17 public health leadership in the world by siding with the majority to prioritize saving lives  
18 over protecting pharmaceutical corporation monopolies and profits. This new position  
19 would be widely noted, given U.S. officials’ shameful attack on the waiver at a January  
20 WTO meeting”; and

21 WHEREAS, COVID-19 is a life-threatening pandemic, and the Seattle City Council does not  
22 agree with the argument made by large pharmaceutical companies in a December 8,

1           2020, IFPMA press release that “IP enables research and development and ensures that  
2           the next generation of inventors and investors will remain engaged”; and

3   WHEREAS, on November 18, 2020, *Scientific American* reported, “Much of the pioneering  
4           work on mRNA vaccines was done with government money, though drugmakers could  
5           walk away with big profits,” and that “[t]he vaccines made by Pfizer and Moderna, which  
6           are likely to be the first to win FDA approval, in particular rely heavily on two  
7           fundamental discoveries that emerged from federally funded research: the viral protein  
8           designed by Graham and his colleagues, and the concept of RNA modification, first  
9           developed by Drew Weissman and Katalin Karikó at the University of Pennsylvania”;  
10          and

11   WHEREAS, on April 8, 2021, *The New York Times* reported about Dr. Katalin Karikó,  
12          explaining that she is “one of the heroes of Covid-19 vaccine development. Her work,  
13          with her close collaborator, Dr. Drew Weissman of the University of Pennsylvania, laid  
14          the foundation for the stunningly successful vaccines made by Pfizer-BioNTech and  
15          Moderna,” and that “[s]he never made more than \$60,000 a year”; and

16   WHEREAS, the Seattle City Council recognizes that big pharmaceutical companies profiting off  
17          human misery is nothing new, and that there is widespread outrage at artificially high  
18          prices for life-saving insulin, EpiPens, and drugs to treat cystic fibrosis and tuberculosis,  
19          and at patent monopolies on essential AIDS medications that made them inaccessible and  
20          unaffordable in the Global South for a decade; NOW, THEREFORE,

21   **BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE THAT:**

22          Section 1. The Seattle City Council joins the more than 400 community organizations,  
23          labor unions, faith groups, and more in urging the Biden Administration to end the US

1 opposition to the Waiver from Certain Provisions of the Trade-Related Aspects of Intellectual  
2 Property Rights Agreement for the Prevention, Containment and Treatment of COVID-19 at the  
3 World Trade Organization (WTO). The Seattle City Council urges the Biden Administration to  
4 immediately share publicly all research, technology, techniques, and other information relevant  
5 to the production of COVID-19 vaccines (such as mRNA research) that is owned or co-owned  
6 by the U.S. The Seattle City Council shall sign onto the open letter to President Biden titled, “To  
7 Help End the Pandemic as Quickly as Possible and Restore U.S. International Cooperation,  
8 Please End Trump’s Blockade of the COVID-19 Emergency Waiver of WTO Rules So More  
9 Vaccines and Treatment Can Be Produced,” substantially as shown in Attachment A to this  
10 resolution.

11 Section 2. The Seattle City Council requests that the Office of Intergovernmental  
12 Relations communicate the content of this resolution to the Executive Office of the President and  
13 to Seattle’s Congressional Delegation in Washington, D.C.
